

Pairing Tool

Barcelona Chapter

User Type	Story
Organiser	As an organiser I want the app to have a login so only the people with the password can access.

User Type	Story
Organiser	As an organiser I want to be able to create a workshop.
Organiser	As an organiser I want to be able to manage a workshop.

Create a Codebar Workshop

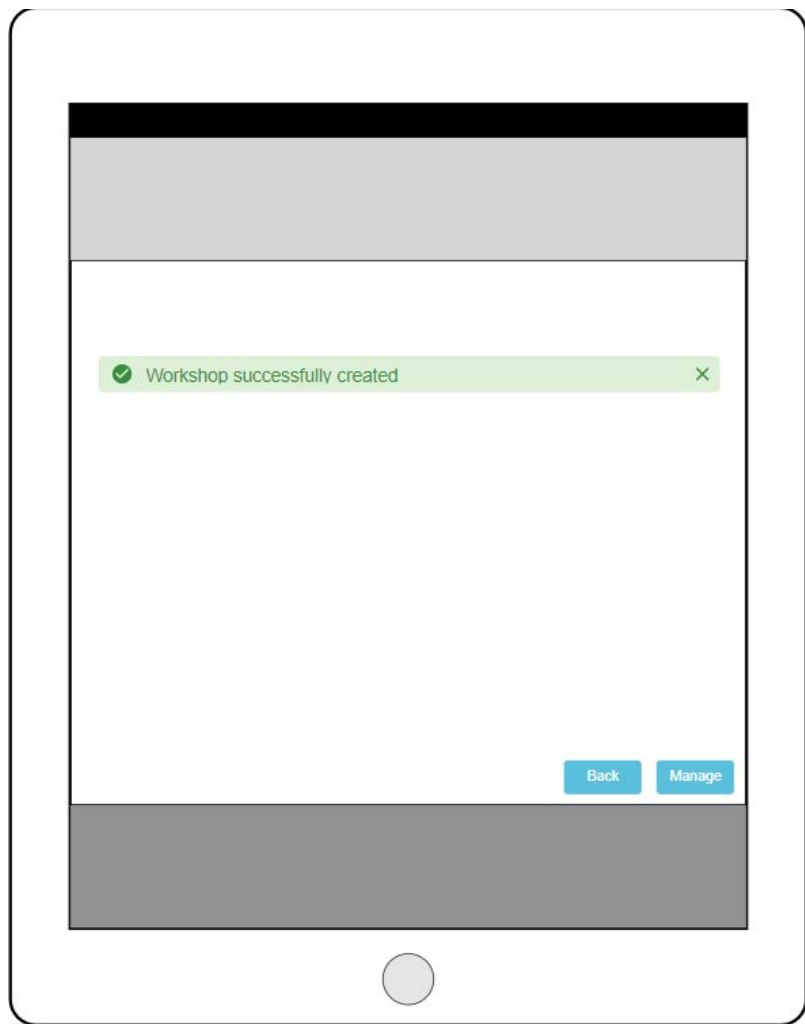

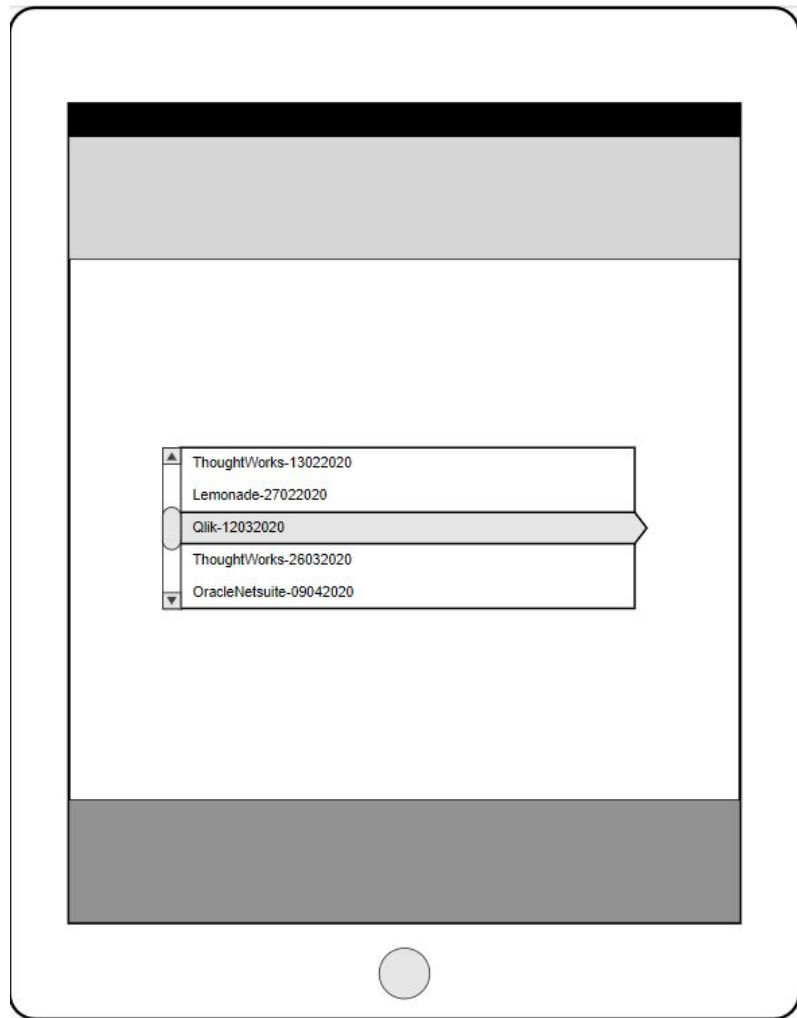

Basic Workshop information:
-How to find us
-Participant limit
etc.

User Type	Story
-----------	-------

Organiser	As an organiser I want to be able to create a workshop and add a Date, Location, Name and some basic information.
-----------	---

Organiser	As an organiser I want to be able to import a list of participant to the matching workshop.
-----------	---

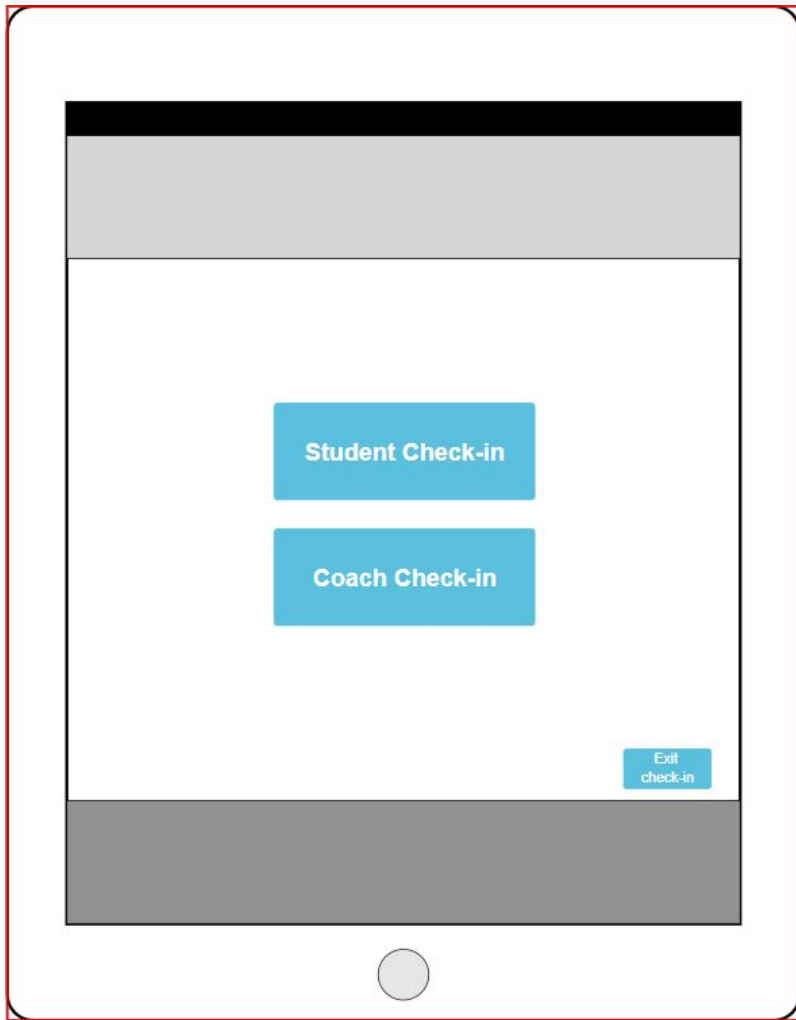

User Type	Story
Organiser	As an organiser I want to be able to see a list of workshops to select a workshop to manage.

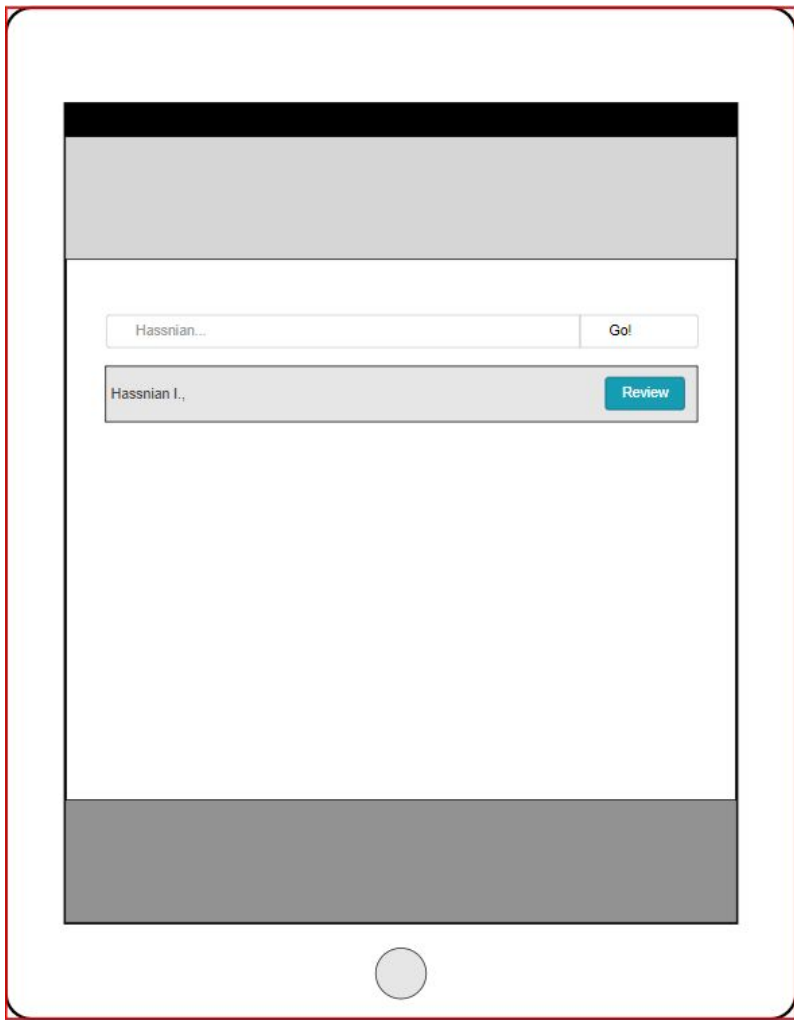

User Type	Story
Organiser	As an organiser I want to access a tool for creating groups for the workshop.
Organiser	As an organiser I want to edit a workshop information.
Organiser	As an organiser I want to be able to launch the check-in process generating a link so the access to that part is public for student/coaches.
Organiser	As an organiser I want to be able to go to the pairing process.

Student-Coach Public Check-in

This part is accessed through a link that is generated when an Organiser creates the workshop (or it could be when it presses the start check-in process button)

User Type	Story
Student	As a student I want to be able to do the check-in process for myself.
Coach	As a Coach I want to be able to do the check-in process for myself.

User Type	Story
Student	As a student I want be able to look for my name when checking in.

Hassnain I.,

Technologies: Could you coach:

- JavaScript Medium ☐
- PHP Advanced ☒

Add technology...

What do you want to learn today?

1. React.js

User Type	Story
Organiser	As an organiser I want to see the information of a student or coach.
Organiser	As an organiser I want to see a visual cue if a student or coach comes for the first time.
Organiser	As an organiser I want to see a warning if a student has a single coach available for their technology.
Organiser	As an organiser I want to see a warning if a former coach has checked-in.
Organiser	As an organiser I want to be able to see a warning if the student/coach it's been matched with someone that he/she indicated that doesn't want to be paired
Organiser	As an organiser I want to be able to see a warning if a first timer coach and student are being paired together
Organiser	As an organiser I want create a new group.
Organiser	As an organiser I want "fix" a group.
Organiser	As an organiser I want to be able to save a matched group
Organiser	As an organiser I want to be able to update a saved group
Organiser	As an organiser I want to delete a group.

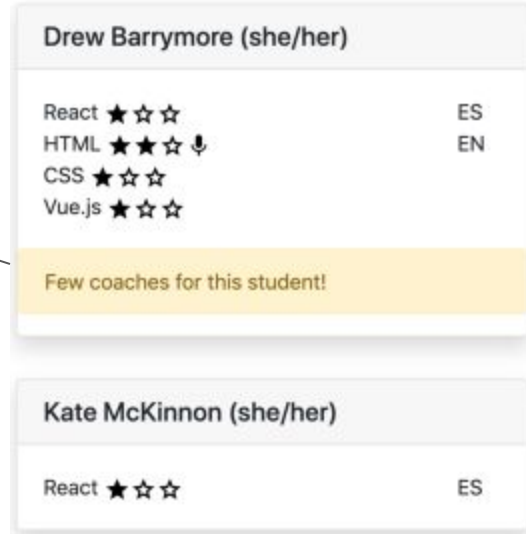

We should add the number of totals student and coaches already checked-in and the total. (Visual help)
I.e. Coaches 11/15
Students 9/13

User Type	Story
Organiser	As an organiser I want to see a grouped participant disappear from the student/coach/soft coach list.
Organiser	As an organiser I want to leave the pairing process and return without losing my progress.
Organiser	As an organiser I want to save my pairings indefinitely.
Organiser	As an organiser I want to generate pairing suggestions automatically.
Organiser	As an organiser I want to see if a student/coach has indicated their desire not to work with a specific person.
Organiser	As an organiser I want to see a count of signed up students/ coaches.
Organiser	As an organiser I want to see a count of checked-in students/coaches.
Organiser	As an organiser I want to switch view between all participants and only checked in.
Organiser	As an organiser I want to be able to see a list of soft coaches (students that are willing to coach something they feel comfortable)

This is a more real example of how the cards would look like.

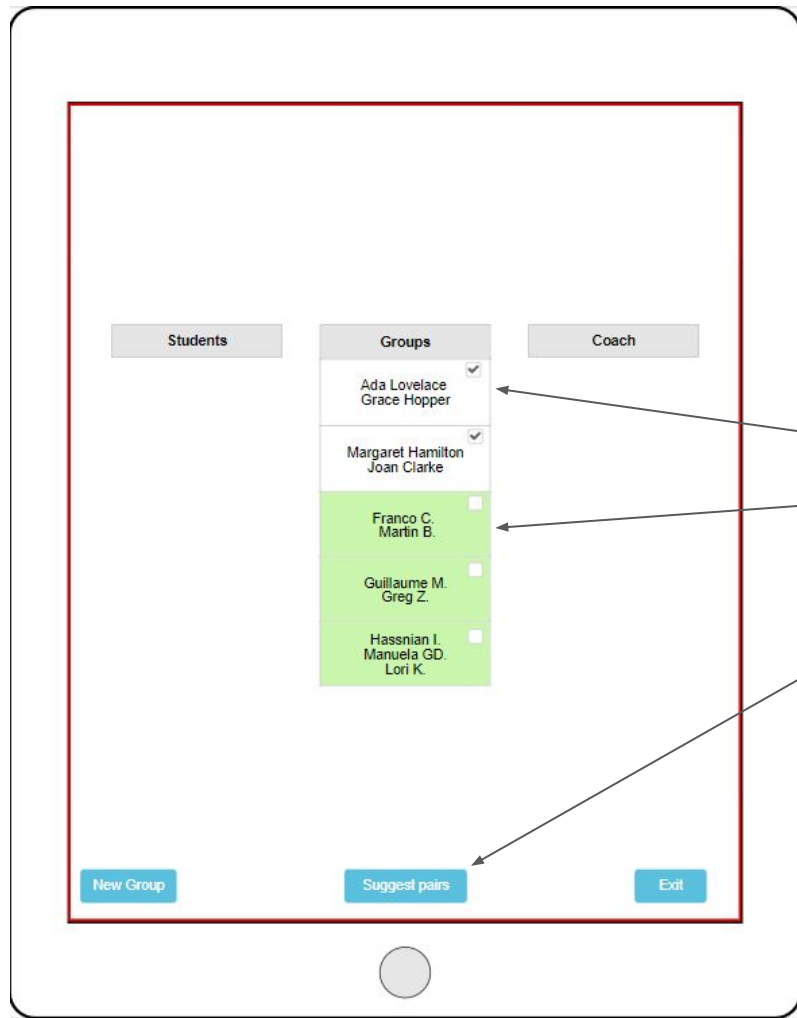

When the Organiser hits the New Group button it will create a ready-to-populate New group.

It will highlight the best matches considering stack and language.

We select a student and drag it to the previously created group.

The other option is to hit the Suggest Pairs button and it will shuffle between people that considers a good match but leaving outside the predefined or "fixed" groups.
